### POTENTIAL HEALTH EFFECTS

**Inhalation:** High vapor/aerosol concentrations (greater than approx. 700 ppm at elevated temperatures above ambient) are irritating to the respiratory tract over prolonged exposure, may cause headaches, dizziness, anesthesia, drowsiness, unconsciousness and other CNS system effects, including death

**Skin Contact:** frequent or prolonged contact may irritate and cause dermatitis. Skin contact may aggravate existing dermatitis condition. Low order of toxicity.

**Eye Contact:** May cause eye irritation

**Ingestion:** small amounts of the liquid aspirated into the respiratory system during ingestion, or from vomiting may cause mild to severe pulmonary injury, possibly progressing to death. Minimal toxicity.

Chronic Effects and Medical Conditions Aggravated By Overexposure: None known.

## Section 4 Health Information & Protection

**INHALATION:** If vapors or fumes cause irritation, using proper respiratory equipment, remove victim to fresh air.

Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention

**SKIN:** Flush with copious amounts of water. If irritation persists, seek medical attention

**EYES:** Flush with copious amounts of water. If irritation persists, seek medical attention

**INGESTION:** Do not ingest. Do not induce vomiting. Seek prompt medical attention.
